Information

- Font or indications may be different from those on the actual screen or may be partly omitted for better readability of PDF manual.
- Screen color tones shown in this manual are those obtained with the default setting. Note that this PDF manual may not reproduce actual screen color tones correctly.

Manners for Using Cellphones

- A cellphone always generates weak electric waves while its power is ON.
- Be considerate of others and the environment around you, and have fun using your cellphone safely.

● In some places, the use of cellphones is prohibited.

- Do not use cellphones while you are driving. Doing so is dangerous and also forbidden by law.
- Be sure to turn your cellphone OFF before you board airplanes. The use of cellphones onboard airplanes is forbidden by law.

● Electric waves from cellphones may adversely influence medical devices and equipment.

- People with a pacemaker may be close to you in crowded places such as trains. Turn your cellphone OFF in such places.
- Abide by the instructions of hospitals and other medical institutions where it is forbidden to use or carry cellphones.

● Consider where to use your cellphone and be careful of how loudly you talk.

- Do not make calls in cinemas, theaters, museums, libraries and other similar places. Turn your cellphone OFF or set it to the manner mode to prevent others around you from being inconvenienced by ring tones for incoming calls or mails.

- When on a crowded street, use your cellphone in places where you do not prevent others from passing.
- When on a train or in a hotel lobby, move to areas where you will not bother others around you.
- Take care not to talk too loudly during conversations.

- Get permission from persons who will appear in photos or movies before you shoot photos or movies of others with your cellphone.

What You Can Do with Position Search

When your kids are coming home late or getting lost, you can check the current location of your kids with easy operation. The Position Search provides two services of “位置確認メール (Position Search Mail)” and “いつでも位置確認 (Auto Position Search)”.

位置確認メール (Position Search Mail)

● Features

- Mothers can send a mail with a message to their kids.
- Kids will check the message from their mother and notify the current location where they are.

Example : When the mother searches her kid

いつでも位置確認 (Auto Position Search)

● Features

- Provides the current location of the kids automatically without any operation by the kids when the mother searches them. It is recommended for little kids who are hard to handle cellphones.

Example : When the mother sends a mail to her kid

- Additional monthly charge is required.

What You Can Do with Area Message

A message is automatically sent from the kid's au cellphone to the mother's, when the kid are getting to (or staying in) the pre-specified area in the pre-specified period of time. Notification is also available when the kid is getting out (or leaving) the pre-specified area.

エリア通知 (Area Message)

● Features

- Feel easy even when your kid is out to the after-school lessons or on his/her way home. Location information is notified from the kid's au cellphone to yours automatically when your kid is getting through the specified location.

Example : When the mother checks the area of her kid

Information

- “安心ナビ (Security Navi)” service is only for use between service compatible phones.
- Register phone numbers to the address book between service compatible phones before using “安心ナビ (Security Navi)”.
- Before using “安心ナビ (Security Navi)”, be sure to confirm and agree the Terms of Use on starting the service, and make the settings of the Navi Password. * The other party is also required to agree the Terms of Use.
- Area information may appear differently in underpasses, indoor or near buildings where the reception level of the electric waves from GPS satellites is poor.
- If the positioned location information is different from the actual location, Area Message may not be notified correctly.
- Positioning location is not available under following conditions; out of service area, setting Incoming Reject, with no application, under operation, or no-compatible phones.
- The screen is only an image and may differ from the actual screen.
- When you stop the C-mail service, “安心ナビ (Security Navi)” is not available.
- EZ apps communication fee is included in Free Calling Time, however, it is excluded from the discount service of Family C-mail and packet communication fees.
- Positioning location or Viewing maps requires additional packet communication fee.

EZ Television

You can watch Digital Terrestrial Broadcasting for Mobile Television Service “1Seg” with EZ Television (1Seg), and Analog Terrestrial Broadcasting in Japan with EZ Television (Analog).

EZ Television (1Seg) provides not only television programs, but data broadcasting programs.

* In this section, description of EZ Television represents both EZ Television (1Seg) and EZ Television (Analog).

*1 It is subject to change due to the operation of the data broadcasting.

*2 The function ends automatically when an hour elapses.

- You can save recorded television programs as still images or movies into Data Folder.
- The layout and contents of the screens shown here are subject to change. Screen images are only examples.

■ Digital Terrestrial Broadcasting for Mobile Television Service (1Seg)

Digital Terrestrial Broadcasting provides the programs of the digitalized Analog Terrestrial Broadcasting which started in Kanto/Chu-kyo/Kinki areas centered around Tokyo/Nagoya/Osaka from December, 2003. (The digital broadcasting will start in other areas by the end of 2006.) And Data Broadcasting service is also available. There is also a service called Mobile Television Service (1Seg), which, by using a part of the electric waves of Digital Terrestrial Broadcasting, enables you to watch TV or Digital Broadcasting with cellphones or other mobile devices just like you watch them at home.

1Segment Broadcasting (1Seg) is called "1Seg" since the service divides the 6MHz wave range of Digital Terrestrial Broadcasting into 13 segments and uses the one segment to broadcast. You can watch the Digital Terrestrial Broadcasting for Mobile Television Service (1Seg) with W33SA II .

Digital Terrestrial Broadcasting programs or Digital Terrestrial Broadcasting for Mobile Television Service (1Seg) are broadcasted on the UHF electric wave of Analog Terrestrial Broadcasting.

Digital Terrestrial Broadcasting for Mobile Television Service (1Seg) starts in Tokyo/Nagoya/Osaka and some other areas by turns from April 1st, 2006.

Refer to the details of the "1Seg" service to the homepage etc. below.

■ For Better EZ Television Reception

Deteriorated image, poor sound quality or reception failure may occur in mountains, near buildings, in underpasses, in tunnels, or indoors because of poor TV reception. To improve the reception of electric waves, try the following:

- The W33SA II Antenna (EZ Television/EZ·FM Reception) and SANYO Flat-type Stereo Earphones 05 serve as an antenna. Extend the W33SA II Antenna (EZ Television/EZ·FM Reception), or connect SANYO Flat-type Stereo Earphones 05 and strain the earphone cord, and then turn it towards the direction where reception is best.
- When you are indoors, take your W33SA II as close to a window as possible.

■ Antenna Available for W33SA II

To watch EZ Television, use antennas for optimal reception of electric waves.

There are two types of available antennas: Antenna (EZ Television/EZ·FM Reception) included in the W33SA II and SANYO Flat-type Stereo Earphones 05.

◆ When watching the VHF channel

Extend the W33SA II Antenna (EZ Television/EZ·FM Reception) or connect SANYO Flat-type Stereo Earphones 05; you will then experience an improved reception of electric waves.

◆ When watching the UHF channel

Extend the W33SA II Antenna (EZ Television/EZ·FM Reception).

Other Features

The W33SA II is provided with other useful features.

Front Style

You can shoot the photos or movies in the digital-camera like style, or watch EZ Television in a wide screen.

Multi-media Function

The functions of the music player supporting SD-Audio format or the video player to enjoy the video movies recorded by DVD Recorder are available.

Ugomoji Mail

You can enjoy displaying pictographs or text in sent/received E-mails as animation.

Auto Cursor Move

By setting this function, the cursor moves automatically to the right without pressing the cursor while entering characters on the screen.

Infrared Data Exchange Feature

Infrared data exchange feature (IrDA) allows you to exchange address book information and files in the data folder.

with Disney!

You can convert the wallpaper, ringer, images on the sending/receiving screen and Main Menu into Disney Character all at once.

バーコードリーダー＆メーカー (BARCODE READER&MAKER)

By recording a bar code (JAN code, QR code) with the W33SA II, it is possible to read bar-coded characters. The read information can be used for the address book or mails.

アプリモコンEZ (applimocon EZ)

Using the infrared data exchange feature, you can remotely operate the TV, video recorder, or DVD player.

Mass Storage Mode

By connecting the attached USB Cable WIN (sold separately) to a personal computer, it is possible to use the miniSD™ Memory Card provided with the W33SA II just like other storage media. It is very useful as it makes it easier to exchange data with personal computers.

Powerful Dictionary Features

English-Japanese, Japanese-English and Katakana-English dictionaries are installed in the W33SA II. These dictionaries can be very useful as you can also translate English into Japanese and vice versa while entering characters.
